Heroku

Languages

English | Native

Russian | Native

Spanish | Basic

Robert Safin

Web Developer

PROFILE

Economist with 2 years' experience of working in diverse teams and industries. Finally making a long-awaited plunge into programming. Finishing Le Wagon full-stack web-dev bootcamp lit a flame in me, a true appreciation of what it's like to be in the deep-end, importance of clear communication and teamwork. A completionist, critical thinker and problem solver in nature and otherwise a knowledge sponge eager to grow. Looking to challenge myself in the new industry. Currently learning the MERN stack (MongoDB, Express, React and Node).

SOFT SKILLS

- Strong work ethic, initiative to drive to deliver quality on time.
- Naturally curious and self-motivated, always looking to learn more and incorporate new knowledge into the flow.
- Calm and collected, able to manage and prioritise tasks.
- Strong verbal and written communication.

PROJECTS

·Space Trip – A rails marketplace app for transacting trips to space. Project built in a team of 4 within the bootcamp. Acting as technical lead, I managed the back end, distributed tasks, and moderated the merging of branches. Built with Rails 7. <https://space-trip.herokuapp.com/>

·Virtual Styler- A rails app for convenient interior design choices, where users can filter their design preferences and view furnished interiors and purchase pieces of furniture. Alternatively, users can get in touch with designer, upload 3D model created with their phone camera, and let the designer populate the model. Built with Rails 7. <https://www.virtual-styler.me/design>

EXPERIENCE

2022-2023
Petroleum Company I Moscow

ECONOMIST

·Successfully solving problem of a long-neglected delta in the balance of loyalty programme points.

·Analysing the performance of past promotions, developing models for forecasting the performance of future promotions, demonstrating initiative.

Adopting critical thinking to generate insights and reports about the industry and the competition.

2021-2022
Real Estate Development Fund I Moscow

DEVELOPMENT SPECIALIST

·Appreciation for clear communication between English architects and Turkish constructors.

·Versed in attention to detail, as I documented the construction sites and compared them against the architectural designs.

·Multitasking while upkeeping the central areas/volumes model for the development, as incoming data often conflicted.

·Evaluation and appraisal of future site independently.
