Robert Safin

Full-Stack Developer

PROFILE

I am an aspiring full-stack developer, focusing on react with Next.js. I have 2 degrees from London universities and experience working in real estate development and as an oil and gas economist. I am now looking to transition into a career in software development. I have attended a 3 month intensive coding bootcamp `Le Wagon` and currently working and learning on my own projects. I strife to write typesafe, maintainable code as well as provide a great user experience. I am now looking for remote work opportunities.

TECH SKILLS

- HTML
- CSS
- TypeScript
- Javascript
- Ruby
- Next.js
- Express.js
- React
- Node
- Ruby on Rails
- Prisma
- MongoDB
- PostgreSQL
- SQL
- React-Native
- TailwindCSS
- Bootstrap
- Heroku
- Vercel
- Git

PROJECTS

- Geolocation based advertising platform for SMEs, powered by Google and MapBox. Built with React/Next.js as a full stack application with PostgreSQL and Prisma. The app leverages React's server components and Next.js server actions to provide a typesafe codebase and reduced client bundle.
- Social media app revolving around trustworthy product reviews. Leverages Next.js' Express like API backend. Implements MongoDB as data store.
- Link sharing app (LinkTree clone). Features a highly responsive design with help of Tailwind utility classes.
- Demo 3D website for an art gallery. Built with React Three Fiber (R3F).

EXPERIENCE

2022-2023
Petroleum Company l Moscow

ECONOMIST

- Successfully solving problem of a long-neglected delta in the balance of loyalty programme points.
- Analysing the performance of past promotions, developing models for forecasting the performance of future promotions, demonstrating initiative.
- Adopting critical thinking to generate insights and reports about the industry and the competition.

2021-2022
Real Estate Development Fund l Moscow

DEVELOPMENT SPECIALIST

- Appreciation for clear communication between English architects and Turkish constructors.
- Versed in attention to detail, as I documented the construction sites and compared them against the architectural designs.
- Multitasking while up-keeping the central areas/volumes model for the development, as incoming data often conflicted.
- Evaluation and appraisal of future site independently.
